Are you up to play with the Tough Topics and Trends in Health and Safety?

Our 2019 annual Health and Safety Forum has a diverse range of entertaining, straight talking guest speakers who have extensive knowledge and real-world experience in their field, and who can offer some practical guidance and help you really tackle these tough Health and Safety topics.

There is something for everyone this year, including the hugely topical Pike River Re-entry with a presentation from the Pike River Recovery Agency CEO Dave Gawn, WorksafeNZ CEO Nicole Rosie, and a variety of speakers including an Organisational Psychologist on managing stress, changing attitudes to safety around quad bikes, what happens after an Enforceable Undertaking is accepted, managing risk under the new hazardous substances regulations, the neuroscience of safety, as well as modern tools enabling assessment, improvement and monitoring of organisational performance.

Regardless of which sector you work in, or the size of your organisation, our Forum will give you and your organisation access to the most up-to-date Health and Safety information to give you the tools and industry know-how to raise standards in worker protection.

Speakers

DAVE GAWN

Pike River Recovery Agency -
Explaining the hazards and risks associated with the Pike River Re-entry.

ALAN BOSWELL

Health & Safety Consultant, Canterbury Employers' Chamber of Commerce -
Managing risk under the new Hazardous Substances Regulations.

BRENT SUTTON

Principal, Safety Associates -
Enforceable undertakings - what happens after?

NICOLE ROSIE

WorksafeNZ -
Leadership, worker engagement & risk management.

MATT HINE

General Manager, OceanaGold Macraes Operation -
Creating a safer workplace - Macraes Mining Operation.

DEANNE BOULES

InSync Workplace Solutions -

“TOUGH TOPICS & TRENDS”

Speakers and topics:

DAVE GAWN

Pike River Recovery Agency

Explaining the hazards and risks surrounding the Pike River Re-entry.

Dave leads the Pike River Recovery Agency and is accountable to the Minister responsible for Pike River Re-Entry Andrew Little, while working in partnership with the families reference group.

BRENT SUTTON

Principal, Safety Associates

Enforceable Undertakings: What happens after an Enforceable Undertaking is accepted?

Brent is a specialist in health and safety critical event management of serious harm and fatality incidents and works with insurers and legal firms on WorkSafe NZ enforcement matters.

JONATHAN BLACK

Organisational Psychologist

Managing stress in the workplace.

Johnathan is a Chartered Organisational Psychologist specialising in health, performance and workplace conflict. Jonathan will provide you with a practical insight into stress in the modern workplace, it's prevalence and impact on performance, communication, employee health and supervisor responsibilities.

NICOLE ROSIE

CEO, WorksafeNZ

Leadership, worker engagement and risk management - the keys to performance improvement.

Nicole believes transforming New Zealand's health and safety performance is critical to reducing harm to our people and to sustaining and accelerating New Zealand's economic success.

Nicole wants to make a difference and leading the health and safety system to work-leading best practice is the best way to do that.

ALAN BOSWELL

Health & Safety Consultant, Canterbury Employers' Chamber of Commerce

Managing Risk under the new Hazardous Substances Regulations.

In December 2017 the rules surrounding the management of hazardous substances that affect human health moved from the HSNO Act to the Hazardous Substances Regulations under HSWA. WorkSafe now focus on the storage, use and handling of hazardous substances whilst the EPA have taken a step back when considering workplace interaction. There are changes in the way we must deal with the handling of hazardous substances due to the move to regulations. This presentation will look at the major changes and how, practically, you can transition in order to maintain compliance.

MATT HINE

General Manager, OceanaGold Macraes Operation

Creating a Safer Workplace - Macraes mining operation.

Prior to joining OceanaGold in August 2018, Matt has extensive experience in both open pit and underground operations with Evolution Mining and Glencore Xstrata throughout Australia. He holds a Bachelor of Mining Engineering degree and is currently studying for a master's degree in Business Administration and Management externally through Central Queensland University. Matt is a certified First Class Mine Manager with a strong passion for the minerals industry and enjoys building teams that strive for achievement beyond compliance with respect to safety practices, operational performance and environmental stewardship. He is a firm believer in partnering with local communities to ensure they are better off for mining's involvement, and in developing a workplace culture that is inclusive and rewarding.

ANN MCKENZIE

Safe365

Modern tools that enable assessment, improvement and monitoring of health, safety and well-being capability, culture, performance and engagement.

This presentation will provide interesting market insights from leading health & safety software provider Safe365 as well as introducing participants to the breadth of intelligent, data driven tools Safe365 offer SME's that support them to keep their workforce healthy and safe in an efficient, practical and evidence based manner. Safe365 has worked with over 1600 businesses in the past 2 years and provides aggregated benchmarking data to help organisations increase awareness and enable them to implement lasting continuous improvement.

JANE MAIR

Changing our attitudes to safety around Quad bikes - could the effects be far reaching?

Jane has a background in medicine and education and is an Educational Designer at the Open Polytechnic of NZ.

Three years ago her middle son, Rhys, was killed in a quad bike accident aged 17. As well as being a wonderful son and brother, Rhys was a much-loved friend and a great encourager of others. His accident, like so many, could easily have been avoided.

Continuing Rhys's example, Jane wishes to encourage a more positive approach to safety in NZ so that we don't lose more good people. Often it's the small changes that make the big difference.."

DEANNE BOULES

InSync Workplace Solutions Neuroscience of Safety - a brain based approach to shifting safety performance and culture.

Learn how to apply the latest brain research to drive positive change in your organisation in this not-to-be-missed, fast paced, interactive, informative presentation.
